# COOKING WITH PRESSURE

### FAST

The contents of the pressure cooker cooks at a higher temperature than what can be achieved by a conventional boil — more heat means more speed. Pressure cooking is about twice as fast as conventional cooking (sometimes, faster!)

Add ingredients & liquid to Instant Pot®

### HEALTHY

Pressure cooking is one of the healthiest cooking methods. According to a study published in the Journal of Food Science, pressure cooking preserves 90-95% of vitamins. The extra speed and heat of pressure cooking practically flash-cooks vegetables, allowing them to retain more vitamins than boiling, (which only retains 40-75%), or even conventional steaming (75-90%!)

Select a cooking program

### GREEN

Pressure cookers require less energy/electricity to operate during the cooking process. Less heat and time translates to up to 70% energy savings in comparison to conventional cooking.

Continue your daily life until it beeps

### EASY

Pressure cooking isn't complicated at all. Simply push a button to reach pressure and then easily release it. It's really as easy as 1, 2, 3, and 4!

Release pressure & serve!

### CLEAN

No more spill-overs in the oven or splatters on your stove-top. Pressure cooking contains all of the splatters that you would ordinarily experience when conventionally boiling food.

### SAFE

Modern pressure cookers have additional safety systems to ensure that if one should fail, another will kick-in.

# Venting Methods

Once cooking is complete, there are 2 methods to release pressure:

## Natural Release (NR)

Leave the steam release handle in the Sealing position. The cooker dissipates heat so pressure releases naturally over time.

This method must be used when cooking food such as soups, stews or chilis, as well as food that expands, such as beans and grains.

**Note:** Depressurisation time will vary based on volume of food and liquid. May take 10-40 minutes or longer.

## Quick Release (QR)

Quickly and carefully turn the steam release handle from Sealing to Venting. A continuous stream of steam will release through the top of the steam release handle until the float valve drops into the lid.

**Note:** It will be loud! If spatter occurs, move the steam release handle back to Sealing and try again after a few minutes. If spatter continues, use NR to vent remaining pressure.

### WARNING

Do not lean over or touch the steam release handle.

Do not place unprotected skin over the steam release handle.

Do not cover the steam release handle.

Float valve will drop when cooker has depressurised.

**Do not attempt to open the lid while the float valve is still popped up.**

	kalabasa squash, cubed		root part pounded
1 piece	large yellow onion, diced	1 to 2 tsp	calamansi juice to taste
2 pieces	medium carrots, diced		
4 cloves	garlic, minced		
1 piece	2-inch fresh ginger,		
	grated or minced		
3 pieces	long green chili peppers,		
	thinly sliced (seeded for a		
	milder heat or omit entirely)		
4 cups	vegetable broth		
2 pieces	large Fuji apples, unpeeled		
	and roughly chopped		
1 1/2 tsp	salt		
1 1/2 cups	(1 13.5 oz can) coconut milk		

## Optional

Crushed peanuts (garnish)  
fresh cilantro chopped (garnish)

## Directions:

1. Slice squash into half. You may **[Steam]** with Instant Pot for 5 minutes to soften and make it easier to slice. Scoop out seeds and cut the squash into 1 1/2-inch chunks, making about 5 cups. Select the Sauté setting on the Instant Pot and, after a few minutes, add the oil. Once the display reads **"HOT,"** add the onion and carrots and cook for 5 minutes, stirring occasionally, until the onion begins to brown.
2. Add the garlic, ginger, and chilis (if using) and cook for 1 minute, stirring frequently.
3. Pour in the vegetable broth to deglaze the pan and use a wooden spoon to scrape up any browned bits on the bottom of the pot. Add the kabocha squash, apples, salt, coconut milk, fish sauce, and lemongrass. Stir to combine well. Select the **[Cancel]** setting.
4. Secure the lid and set the Pressure Release to **Sealing**. Select the **[Soup]** setting at **HIGH** pressure and set the cook time to 12 minutes.
5. Once the cooking cycle is done, allow to **Natural Release** the pressure for 5 minutes and then switch the Pressure Release knob to **Venting** to release any remaining steam.
6. Open the pot and discard the lemongrass stalks. Using an immersion blender, puree the soup for a few minutes until you have a thick and cream soup. (Alternatively, blend the soup in batches in a high-powered blender. Be sure to remove the center cap from the blender lid to vent steam, but cover the hole with a kitchen towel.)
7. Stir in 1 tsp calamansi juice and taste. Add another tsp of calamansi juice, if desired, and adjust the seasonings accordingly. Transfer the soup to bowls and garnish as desired.
